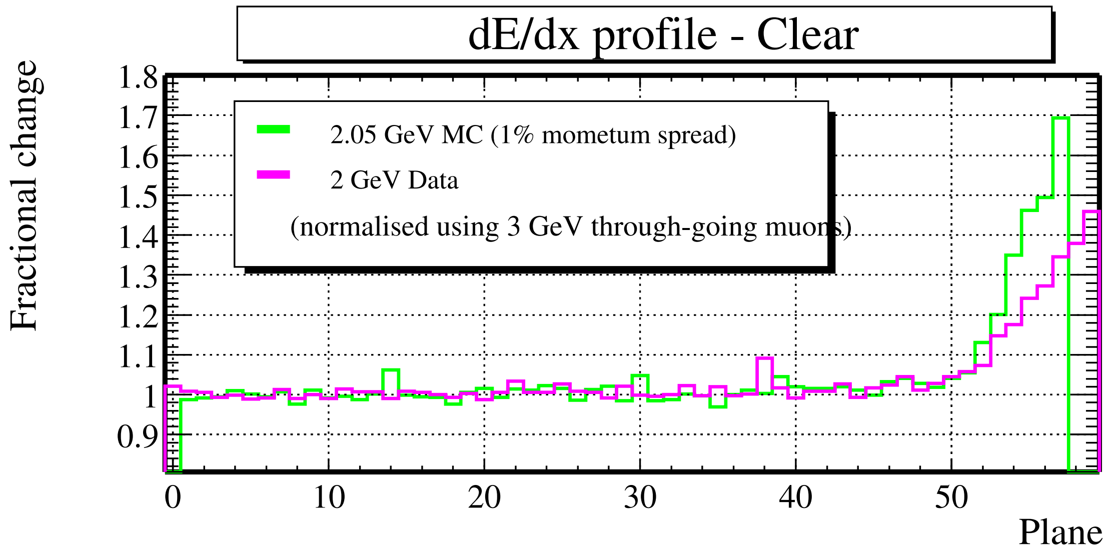
Comparison of μ dE/dx vs plane for MC and data

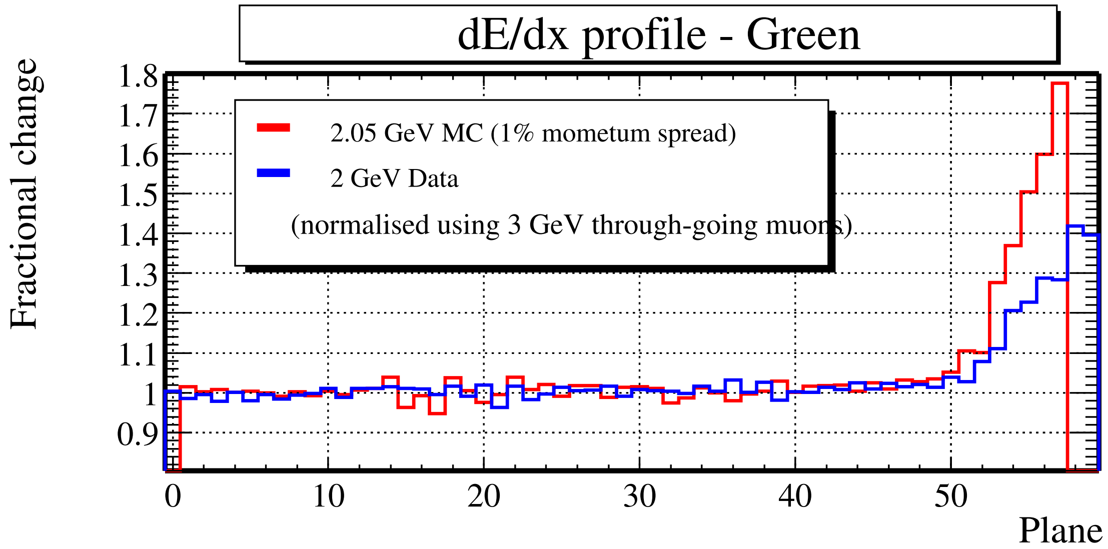
Use same cuts to select stops in plane 53 and above in both MC and data

MC: 2.05 GeV, momentum spread 1%

Data: 2 GeV settings

Use 3 GeV through-going muons to take out scintillator/connector variations





Comparison of dE/dx vs plane for MC and data

As before, but now MC:
2.05 GeV, momentum spread 5%
