

REPORT ON JINST_084P_1111

DATE: NOVEMBER 23, 2011

AUTHOR(S): MAURICE GOODRICK, DAVE ROBINSON, RICHARD SHAW,
MARTIN POSTRANECKY, MATTHEW WARREN

TITLE: Design of a 'Digital Atlas Vme Electronics' (DAVE) Module

RECEIVED: 2011-11-15 18:11:43.0

Referee report

Could you please take into account the few remarks made by the referee?

Could I also remind you that only JINST keywords should be used? Their list is available from the "For Authors" page and directly here:
<http://jinst.sissa.it/jinst/help/keywordsList.jsp>

Thanks for your help.

Referee report

1. The technical content is sound
2. The paper is fairly well written. It would be worth a proofread to correct the minor grammatical errors
3. The figures are clear and correctly referenced.
4. The reference at the bottom of page 5 should be to [9] not [7]. Reference [2] is not cited in the text. Reference [3] should not have 'TWEPP 11 Poster' in the title.

5. The appropriate keywords are: 'Digital electronic circuits', and 'trigger concepts and sytems'

Recommend publication with minor changes as above.
