Traffic Light Changer Plans Like MIRT (tm)

These plans show you how to build a traffic light changer. Yes, this device will allow you to change a red light to green (on properly equipped traffic control devices). This IR Infrared unit is the same device that the police, fire, and ambulances use. To purchase a kit of parts for these plans, go here. For educational purposes only. $9.95 (shipped via email)

ADD TO CART

Cell Phone Jammer Schematics Plans

This is a collection of cellular phone jammer schematics. Three different types of cellular telephone jammers are included. Data sheets, software, and pictures are also part of the package. Works with NAMPS, EAMPS, GSM, CDMA, TDMA, 800 Mhz, 900 MHz, and 1800 MHz. Now includes plans for a PCS cellular jammer! For educational purposes only. $9.95 (shipped via email)

ADD TO CART

GPS Jammer Plans

These are plans to build a Global Positioning System (GPS) jammer. These plans use parts commonly available (old C-band satellite receiver, etc.). Include information on GPS antenna construction. For educational purposes only! $9.95 (shipping included)

ADD TO CART

Satellite TV Jammer Plans

These are plans to build a Satellite TV jammer. This will jam all KU band based TV channels (which are the popular digital satellite TV services). Uses commonly available components. For educational *purposes only! Simply aim the unit towards the target dish, and power on. $9.95 (shipped via email)*

ADD TO CART

Police Radar Jammer Plans

These are proven plans that will jam X, K, or Ka police radar. The plans use standard off-the-shelf parts. Not legal for acutal use. For educational purposes only. $9.95 (shipped via email)

ADD TO CART

Police Laser (lidar) Radar Jammer Plans

These are proven plans that will jam laser police radar (lidar). The plans use standard off-the-shelf parts. Not legal for acutal use. For educational purposes only. $9.95 (shipped via email)

ADD TO CART

Hidden Bug Schematic Plans

This is a collection of schematics for building several types of bugs (hidden listening devices): FM, telephone, and others. For educational purposes only. $9.95 (shipped via email)

ADD TO CART

Tracking Transmitter Plans

This is a collection of tracking transmitter plans. Tracking transmitters can be attched to cars and other vehicles. They can also be used for tracking animals. These plans are for transmitters that operate in the 88 to 160 MHz region. They will operate for days on one or two batteries. We also sell a tracking transmitter kit, go here. for more information. For educational purposes only. $9.95 (shipped via email)

ADD TO CART

Wireless Network Jammer Plans

These plans show how to build a Wireless Network jammer. This jammer will jam 802.11b 2.4 GHz computer networks. Built from commonly available parts. For educationanal purposes only. $14.95 (shipped via email)

ADD TO CART

War Spying Wireless Video Sniffer Plans NEW!!!

These plans show how to build a wireless video network sniffer. This sniffer uses standard, off-the-shelf components. Using this type of sniffer is often called "Warspying". It lets you monitor the transmission of many X-10 wireless video products. For educationanal purposes only. $14.95 (shipped via email)

ADD TO CART

AM, FM & TV Television Jammer Schematics Plans

This is a complete set of schematics plans to build a jammer for AM, TV Television or FM Radio. Uses easy-to-get parts. Everything you need to know to build several different type of jammers are included. For education purposes only. $9.95 (shipped via email)

ADD TO CART

Build Your Own TV Television Transmitter Plans

This is a complete set of schematics plans to build a transmitter for TV Television (UHF and VHF). Uses easy-to-get parts. Everything you need to know to build several different type of transmitters are included. For education purposes only. $9.95 (shipped via email)

ADD TO CART

Build Your Own SW Shortwave AM Transmitter Plans

This is a complete set of schematics plans to build a transmitter for AM Shortave. Uses easy-to-get parts. Everything you need to know to build several different type of transmitters (from very lower power to 10 watts...even includes the venerable Grenade transmitter) are included. For education purposes only. $9.95 (shipped via email)

ADD TO CART

---

800 MHz Jammer Schematics Plans

This is a complete set of schematic plans to build a jammer for 800 MHz Radio. Will work on the data channels for cellular or trunking radio. Uses easy-to-get parts. Everything you need to know to build this jammer is included. For education purposes only. $9.95 (shipped via email)

ADD TO CART

FM Pirate Radio Transmitter Schematics Plans

These are plans to build an FM Stereo pirate radio FM transmitter. This transmitter can output up to 10 watts in FULL stereo. All parts needed are readily available. This transmitter is illegal to operate in the USA. For educational purposes only! $9.95 (shipped via email)

ADD TO CART

Plans for building AM,FM and Shortwave Pirate Radio Antennas

This is a collection of plans that show you how to build several types of AM, FM, and shortwave antennas. Types of antennas in these plans range from diploes to verticals to gain antennas. These antennas can handle 100 watts or more. They also make great receiving antennas! $9.95 (shipped via email)

ADD TO CART

Lightning Detector Schematics Plans

These are plans to build a Lightning Detector. Use this device to give early warning of approching lightening storms. A very interesting project! For educational purposes only! $9.95 (shipping included)

ADD TO CART

Seismic Earthquake Detector Schematics Plans

These are plans to build a Seismic Earthquake Detector. Use this device to give early warning of earthquakes. A very interesting project! For educational purposes only! $9.95 (shipping included)

ADD TO CART

Radiation Detector Geiger Counter Schematics Plans

These are plans to build a Geiger Counter Radiation Detector. Use this device to give early warning of radiation threats. A very interesting project! $9.95 (shipping included)

ADD TO CART

Battery Desulphator Plans

These are plans to build a battery desulphator. Two types of desulphator plans are provided: one based on a 555 timer IC, and the other on a BASIC stamp (tm) microcontroller. A battery desulfator can restore weak lead-acid batteries to almost new condition. This plans will work will all types of lead-acid batteries, like flooded, gell cell, and absorbed glass mat (AGM). project! $9.95 (shipping included)

ADD TO CART

Garage Door Opener Scanner Plans

These are plans that detail how to determine the code of a garage door (or some remote gates). The correct code range is found when the garage door opens. For educational purposes only! $9.95 (shipped via email)

ADD TO CART

Build your own antennas for your 802.11b 2.4GHz wireless network

This collection of plans features several antennas you can build to increase the range of your 802.11b wireless network (Orinoco (tm), Linksys (tm), Airport (tm), Cisco (tm)). Several directional, and well as omni-direction antennas are featured. Increase the range of your home network to several miles! Also, these antennas are great for war driving and war chalking. Wardrive today!. $9.95 (shipping included)

ADD TO CART

The big online book of Survival Techniques

This huge collection of works contains hundreds of pages of survival information. Everything from hunting, food storage, shelters, first aid to survival kits are covered. A great resource in these trying times. $9.95 (shipping included)

ADD TO CART

Plans and Schematics For Building a VLF Receiver

This collection has everything you need to know about building a VLF (Very Low Frequency) Receiver. At these really, really low frequencies, you can hear mother nature at her finest. Electrical storms resonances, the "chorus", and other sounds. Can also be used to listen in on government broadcasts, like HAARP, submarines, and more. $9.95 (shipped via email)

ADD TO CART

Plans and Schematics For Building Car/House/Motorcycle Alarms

This is a collection of alarm plans that cover entry, water, fire, etc. Alaram schematics for you car, boat, home, etc. are included. Be secure today! $9.95 (shipped via email)

ADD TO CART

Plans and Schematics For Several Audio Amplifiers

This is a collection of plans for building many different audio amplifiers. These schematics cover everything from preamplifiers to high power 300 Watt stereo amps. $9.95 (shipped via email)

ADD TO CART

Large Set of Amateur Radio Plans and Schematics

This is a big set of Ham Radio plans. Included are several different HF/VHF/UHF transmitter and receiver schematics. Also included are schematics for various peices of test equipment, antennas, and antenna tuners. This is a complete ham radio schematic reference. $9.95 (shipped via email)

ADD TO CART

800 MHz Scanner Converter Plans

These plans show you how to build an 800 MHz scanner converter. This will allow you to receive 800 MHz cellular, SMR, and police signals in the 400 to 500 MHz range. Reception of cellular signals may be illegal. For educational purposes only. $9.95 (shipped via email)

ADD TO CART

Spectrum/Network Analyzer Plans

These plans show you how to build a network/spectrum analyzer using common components. The piece of test equipment is great for tuning antenna, duplexers, receivers, filters, tranmitters, etc. $9.95 (shipped via email)

ADD TO CART

Build a Theremin

These plans show you how to build several different types of Theremin muscial instruments (from vacuum tube to digital). A Theremin is an instrument played by waving your hands in front of an antenna to create different tones. This instrument was commonly used in old science fiction movies. $9.95 (shipped via email)

ADD TO CART

GPS Antenna Plans

These plans show you how to build several different types of Global Positioning System antennas. The plans are great for building an external antenna for your GPS. Made with commonly available components. $4.95 (shipped via email)
